POTENTIAL

THE POWER OF SELECTION.

OUR PROMISE

FAMILY TO FAMILY FARMING

Axis Seed™ is one of the fastest-growing independent seed companies in the U.S. because of our unique business model. Through local, family-owned Independent Regional Companies (IRCs), you have access to the latest genetics, traits, and technologies, backed by people who genuinely care about your success. What you can expect is a dedicated partnership where you receive premium products selected for your specific soil and profit goals. Because even as the industry evolves with new technologies, success will always come from the relationship—and our family wants to see your family succeed.

Working with Axis is unlike your relationship with any other company, and it won't take long to see why.

Grow Strong®

FAMILY COMES FIRST.
WORK HARD, TREAT PEOPLE FAIR, AND ALWAYS BE THANKFUL.

My name is Nathan Louiso, and above is the motto I live by and guarantee you. I was born and raised in the Buckeye State. I have been in the seed industry my entire career. Together with my sales team, we are committed to helping you discover the products and solutions that are best for you. Loyalty and customer service are the foundations of my business. Combine that with understanding the value of time and the challenges and rewards of running a family business, and you will see why working with Axis Ohio is unlike your experience with any other seed company.

I genuinely care about the success of my customers, so all product recommendations are based on what's best for your operation—not what's best for Wall Street. By choosing Axis Ohio, our customers are able to keep their money LOCAL while gaining access to top-quality products.

AXIS OHIO

Ohio farmers are some of the best in the world. The environment you work in is one of the most unique and challenging. What works in Illinois or Iowa often does not work in Ohio, especially when it comes to seed selection. You deserve a company that understands this. Axis Ohio is here to help you Grow Strong.

That's why we provide growers more options when it comes to putting the right seed in the right soil. We understand that every farm is different. Your soil, your practices, and most importantly, your goals are all different. As an Independent Regional Company of Axis Seed, Axis Ohio provides access to the latest genetics and traits from the top providers. This ensures you will receive the optimal seed for your specific fields. This makes all the difference at harvest.

CORN BRANDS

PREMIUM SEED SELECTIONS
PROVEN TO OUTPERFORM

Grow Strong®

QUALITY FOR YOU

Axis Corn hybrids are specifically selected for the Buckeye State. In addition to yield, I carefully select for the following criteria.

- 1. Emergence and Early Vigor**
- 2. Plant Health**
- 3. Grain Quality**
- 4. Cold Germ**

Axis Seed has the highest quality standards in the industry. Let's talk about Cold Germ and why it makes a difference, specifically in Ohio. I will take the time to learn your operation and recommend hybrids specific for you. These steps ensure Axis seed to have the highest possible performance on your Ohio farm!

40W20 VT2PRIB

89-91 Day Maturity

- Excellent top-end yield performance across wide geography
- Medium statured hybrid with very good stalks and roots
- Strong emergence and seedling vigor to handle cold soils
- Girthy flex ear style suited to all planting populations

45T65 VT2PRIB

94-96 Day Maturity

- Shorter high yielding hybrid
- Excellent drought and greensnap tolerance
- Good Goss' Wilt tolerance
- Very good test weight and late-season health

Also Available As:RR

46M23 VT2PRIB

95-97 Day Maturity

- Semi-flex ear type and very good drought tolerance for tougher acres
- Very good stalks and excellent roots aid late-season standability
- Excellent top-end yield potential across most soil types
- Strong emergence and excellent early vigor for early planting and reduced tillage acres

Also Available As:Conv

50R21 VT2PRIB

99-101 Day Maturity

- Dominant yield performance across years and environments
- Lead platform hybrid with tremendous ear size and girth
- Flex ear style adapts well to moderate planting populations
- Medium-tall statured hybrid with very good standability

Also Available As:Conv

53P21 VT2PRIB 102-104 Day Maturity

- Very good stalks and roots with excellent test weight
- Excellent early vigor for minimum tillage and early planting
- Widely adapted product with very good Goss' Wilt tolerance and low greensnap risk
- Long ears with good kernel depth adds to the fall appearance

Also Available As: Conv

53B25 VT2PRIB 102-104 Day Maturity

- Above average Tar Spot tolerance
- Solid standability
- Dual-purpose potential

54T64 PCE 104 Day Maturity

- Impressive disease package including tar spot
- Tremendous late-season staygreen, health, intactness with strong stalks
- Excellent rating for Goss' Wilt and lower greensnap risk
- Widely adapted with long girthy ears and high test weight

Also Available As: Conv

57K72 TreceptaRIB 106-108 Day Maturity

- Moves south of zone well
- Strong performance in high yielding environments
- Very good early vigor and great drought tolerance
- Goss' Wilt pressure areas will limit western utility

58U38 AA

107-109 Day Maturity

- High-yielding eastern hybrid
- Strong agronomics with outstanding test weight
- Great resistance to GLS and Goss' Wilt
- Very high silage appeal with solid early seedling vigor

Also Available As: Conv

59A25 VT2PRIB

108-110 Day Maturity

- Excellent top-end yield central and east
- Strong stalks and roots along with good intactness aid in late-season standability
- Goss' Wilt tolerance limits western adaptability
- Strong northern resistances with overall solid defensive package

Also Available As: Conv

59D20 VT2PRIB

109-111 Day Maturity

- Strong performance north to south
- Avoid use in fields with a history of Physoderma
- Very good dry down will allow for a smooth harvest
- Great early vigor on this variety

61A66 PCE

111 Day Maturity

- Very showy appearance all season
- Strong stalks and late-season staygreen
- Very girthy ear with good flex
- Excellent emergence and vigor

Also Available As: Conv

63D28 VT2PRIB 112-114 Day Maturity

- Widely adapted hybrid with outstanding yield potential
- Outstanding agronomic package with excellent test weight
- Excels in high yield environment
- Late-season health and intactness

Also Available As: Conv and SSRIB

63H27 VT2PRIB 112-114 Day Maturity

- Strong performance on highly productive soils
- Good northern movement
- Well adapted for the Central and Eastern Corn Belt
- Great stalks and roots with high intactness and stay green

Also Available As: Conv

63M73 TreceptaRIB 112-114 Day Maturity

- Robust plant type with good dual-purpose potential
- Strong yield performance over a very wide geography
- Great intactness and root rating with solid stalks
- Strong performance on non-irrigated acres

63W23 DGVT2PRIB 112-114 Day Maturity

- Very attractive plant with impressive fall appearance
- Produces girthy ears with tremendous kernel flex, size and depth
- Very strong overall disease package
- Optimal performance in moderate to high yield environments

64W69 PCE

114 Day Maturity

- Widely adapted in zone and south with good husk cover
- Moves west well with good Goss' Wilt and lower greensnap risk
- Long consistent ears with very large kernels

64C06 CONV

113-115 Day Maturity

- Outstanding food grade potential
- Excellent staygreen and great root strength
- Great central and eastern hybrid
- Moves south well

65T29 VT2PRIB

114-116 Day Maturity

- Responds to increased nitrogen management
- Long flex ear with excellent test weight
- Full canopied hybrid with heat and drought stress tolerance
- Medium-tall hybrid with fast dry down

Also Available As:Conv

65W75 TreceptaRIB

114-116 Day Maturity

- Widely adapted hybrid with the exception of higher Goss' risk areas
- Keep populations at moderate levels to manage root lodging
- Excellent test weight with attractive late-season appearance
- Medium-tall plant with excellent early vigor

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation and agreement to comply with the most recent stewardship requirements.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with products with XtendFlex® Technology.

B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

Refuge seed may not always contain the DroughtGard® trait. IMPORTANT IRM INFORMATION: Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Products with XtendFlex® Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weedcontrol programs.

Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG. Acceleron®, DroughtGard®,

RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready®, SmartStax®, Trecepta®, VT Double PRO® and XtendFlex® are registered trademarks of Bayer Group. Herculex® is a registered trademark of Dow AgroSciences LLC. Agrisure Viptera® is a registered trademark of a Syngenta group company. LibertyLink logo® and LibertyLink® are trademarks of BASF Corporation. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS product launch stewardship guidance Corteva Agrisciences Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact DAS at 877-4-TRAITS (877-487-2487). Information regarding the regulatory and market status of agricultural biotechnology products can be found at www.biotradestatus.com.

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/Resources/traits-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience. In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist™ crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products. Enlist corn contains genes that confer tolerance to 2,4-D and -fop herbicides, 2,4-D and -fop herbicides will damage or kill crops that are not tolerant to 2,4-D or -fops.

IRM - Property managing trait technology is key to preserving it as a long-term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www.corteva.us/Resources/traits-stewardship.html to download the latest Corteva Agriscience Corn Product Use Guide.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at the following webpage: www.corteva.us/Resources/traits-stewardship.html.

Enlist Duo® and Enlist One® herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions.

Enlist E3® soybeans were jointly developed by Corteva Agriscience and MS Technologies, LLC.™™™ Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of Corteva Agriscience. PowerCore® multi-event technology developed by Corteva Agriscience and Monsanto. Roundup®, Roundup Ready®, Roundup Ready 2 Technology and Design, and PowerCore® are registered trademarks of Monsanto Technology LLC. Liberty®, LibertyLink® and the Water Droplet Design® are registered trademarks of BASF. Enlist®, Colex-D®, and Refuge Advanced® are trademarks of Corteva Agriscience and its affiliated companies. Excellence Through Stewardship is a registered trademark of Excellence Through Stewardship. PowerCore® Enlist® Refuged Advanced® corn products with HX1, VTP, ENL, LL, RR2. Contains a single-bag integrated refuge solution for above-ground insects. In EPA-designated cotton-growing counties, a 20% separate corn borer refuge must be planted with PowerCore Enlist Refuged Advanced products.

Important: Always read and follow label and bag tag instructions: Only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides. Agrisure®, Agrisure® Above, Agrisure Artesian®, Agrisure Total, Agrisure Viptera®, Duracade®, DuracadeViptera®, DuracadeViptera™ Z3, Viptera®, Viptera™ Z3, E-Z Refuge® and Refuge Renew™ are trademarks of a Syngenta Group Company.

Corn trait technology incorporated into these seeds is commercialized under license from Syngenta Seeds, LLC. Herculex® Technology incorporated into these seeds is commercialized under license from Corteva Agriscience, LLC. HERCULEX® and the HERCULEX Shield are trademarks of Corteva Agriscience, LLC.

Think Before You Bin Run

Verification Required The last patent on the original Roundup Ready® soybean trait expired a few years ago and U.S. farmers may legally plant saved seed from some varieties of soybean containing the Roundup Ready® soybean trait. However, it is important that you check with your seed supplier to determine if a specific Roundup Ready® soybean variety is covered by other intellectual property rights, and if so, the policy for saving seed of that variety.

Higher Seeding Rate A higher seeding rate may be required for bin-run Roundup Ready® soybeans compared to new branded seed.

Yield Loss Roundup Ready 2 Yield® soybean, Roundup Ready 2 Xtend® soybean, and XtendFlex® soybean varieties typically have a higher yield opportunity than Roundup Ready® soybean varieties.

Cleanout Loss Loss of seed and/or shrink occurs during the seed cleaning and handling processes for bin-run seed.

Seed Treatment Costs Treating your seed will add costs—both the cost of the treatment and the application of that treatment.

Lost Income Every bushel of saved seed you plant is a bushel you're not selling as commodity grain.

Increased Seed Management If you plan to save and bin-run Roundup Ready® soybeans for planting, you will have to manage your harvest operations and grain storage so that the seed isn't co-mingled with other seed that's covered by intellectual property rights.

High Value of New Branded Seed

Latest Technology

- // High-yielding soybean technologies
- // Better variety options
- // Leading seed treatment options

Customer Service

- // Dealer agronomic support before and after the sale
- // Replant policy support
- // Convenient packaging and delivery

Reliable Germination and Quality

- // Rigorously tested and meets U.S. Federal Seed Act requirements
- // Free of seed-borne diseases
- // Properly stored and conditioned

NEW TRAITS

Soybeans are no longer “just soybeans.” Multiple new trait options along with countless treatments have made this decision more complicated. Because of our independence, Axis soybean recommendations will be based on your needs, not by which chemical company owns the technology. Axis soybeans are bred for Ohio and produced in Ohio. Ask me about the exciting new trait offerings coming soon.

2101E E3 2.1 Day Maturity

- SCN/Rps 1k/BSR/SWM tolerance
- In zone performance that can move north
- BSR resistant

2313E E3 2.3 Day Maturity

- Good SDS and IDC tolerance
- Very good emergence
- Very good stress tolerance

2513ES E3 2.5 Day Maturity

- Unique plant style that brings significant height and good standability
- Very good emergence and stress tolerance
- STS® tolerance

2824E E3 2.8 Day Maturity

- SCN + BSR + Rps H1k
- Good SDS tolerance
- Good PRR Tolerance

2833XFS XF 2.8 Day Maturity

- SCN + BSR + Rps 1c
- Good SWM and IDC
- STS® tolerance

2924ES E3 2.9 Day Maturity

- Sulfonylurea Tolerant
- PRR field tolerance is excellent
- Very good emergence and stress tolerance

3104ES E3 3.1 Day Maturity

- Sulfonylurea Tolerant
- Field notes call out flawless lodging scores
- Rps 1c plus excellent field tolerance to PRR

3124XF XF 3.1 Day Maturity

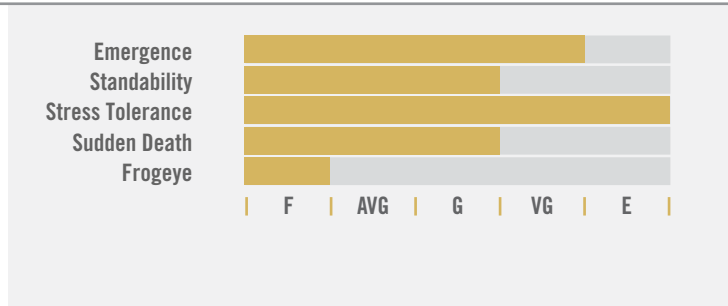

- Lodging scores are very good in stress environments
- BSR Resistance, SCN and excellent field tolerance for PRR
- Excellent stress tolerance

3314E E3 3.3 Day Maturity

- Excellent lateral branching and very good lodging
- Excellent field tolerance for PRR
- Very good SDS scores and BSR resistant

3514ES E3 3.5 Day Maturity

- Sulfonylurea Tolerant
- Intermediate to wide profile with very good lodging scores
- Nice defensive package

3612ES E3 3.6 Day Maturity

- Great SDS resistance and overall solid defensives
- Great standability on this medium+ product
- Changing the game at 3.6 with this light tawny/brown

3862XFS XF 3.6 Day Maturity

- STS® Tolerant
- Medium-tall plant with heavy pod load
- SCN, SDS, PRR 1a gene

3913XF XF 3.9 Day Maturity

- Above average standability with this tall plant type
- Excluder for Chloride sensitivity
- Rps 1c for PRR with average field tolerance

3914ES E3 3.9 Day Maturity

- Sulfonylurea Tolerant
- Medium-tall plant height with moderate branching
- Excellent emergence

ENLIST® WEED CONTROL SYSTEM— PROVEN CONTROL OF TOUGH WEEDS

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use on Enlist® crops.

SOYBEANS 2,4-D choline | Glyphosate | Glufosinate

CORN 2,4-D choline | Glyphosate | Glufosinate | FOP Herbicides

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two sites of action work together to deliver control of yield-robbing weeds and help prevent resistance

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Liberty® herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester
